

In one word, the proposal is \_nonsense\_....

Criminals (and terrorists) will steal this equipment, or use false names, or take whatever measures they see fit to avoid being "registered".

Store personell cannot be expected to detain questionable purchasers.

So what you end up with is a list of law abiding citizens and a serious potential  
for abuse of that list. Not to mention a hell of a bureaucracy....

Please treat this matter with the respect that it deserves, and toss RM-10641  
into  
it in the nearest trash bin....
